Introduction to Database

Practical session 1 Database interface

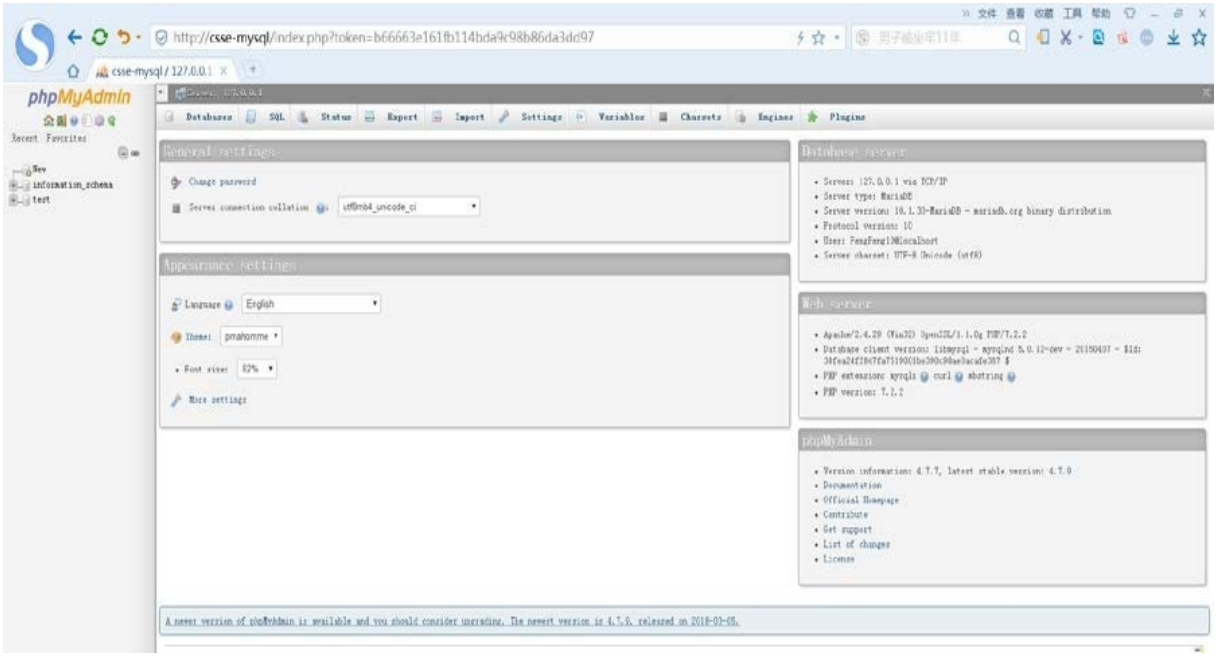

1. Go to the site: http://csse-mysql.xjtlu.edu.cn

2. Now enter your user name without the 'dot' (this is your University account name); for example, FengFeng10 (must use upper/lower case as shown).

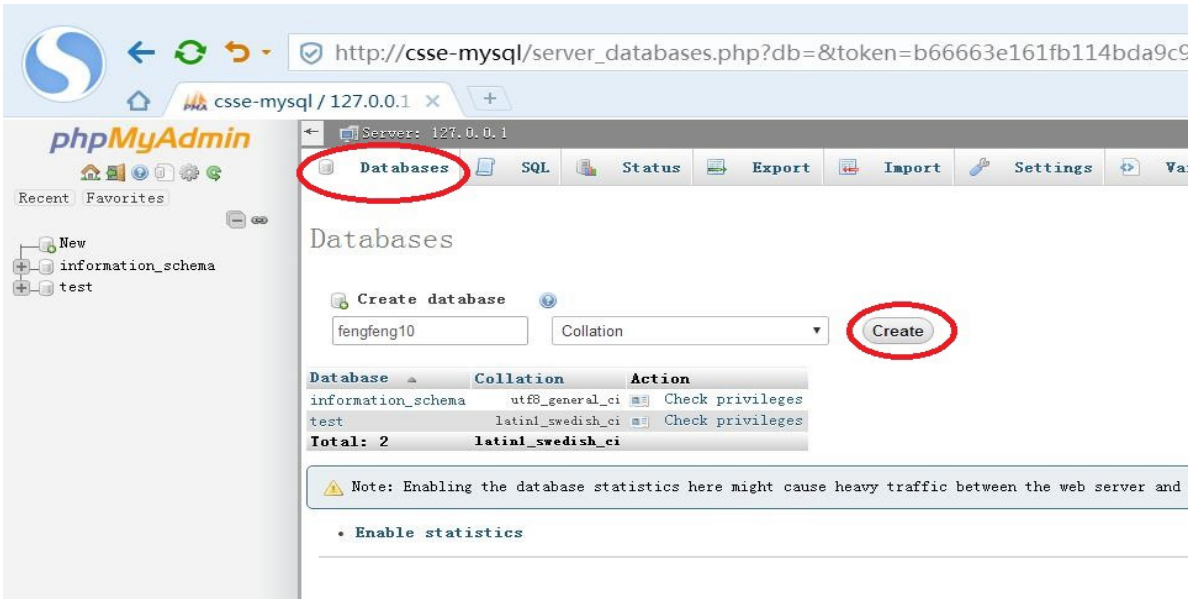

3. The password is ~~"123"~~: "SOE201"

You should now see the Database interface:

Under **Server: 127.0.0.1**, Click the tab "Database". **Create database**, you will see your name, click on the Create button; this will create your database (see below). You have permission to create a database with the same name as your username.

You **can** now click on the **SQL tab** or SQL icon and create the tables. (See below)
