SOE 203

Software Engineering I

Module overview

Attendance

1. Please **scan** the attendance code
2. **Check** if your attendance is correctly recorded or not
3. If any problem, come to **TALK to me in person**, during the breaks or immediately after the lecture/lab.
4. **NO email** to request to update any attendance

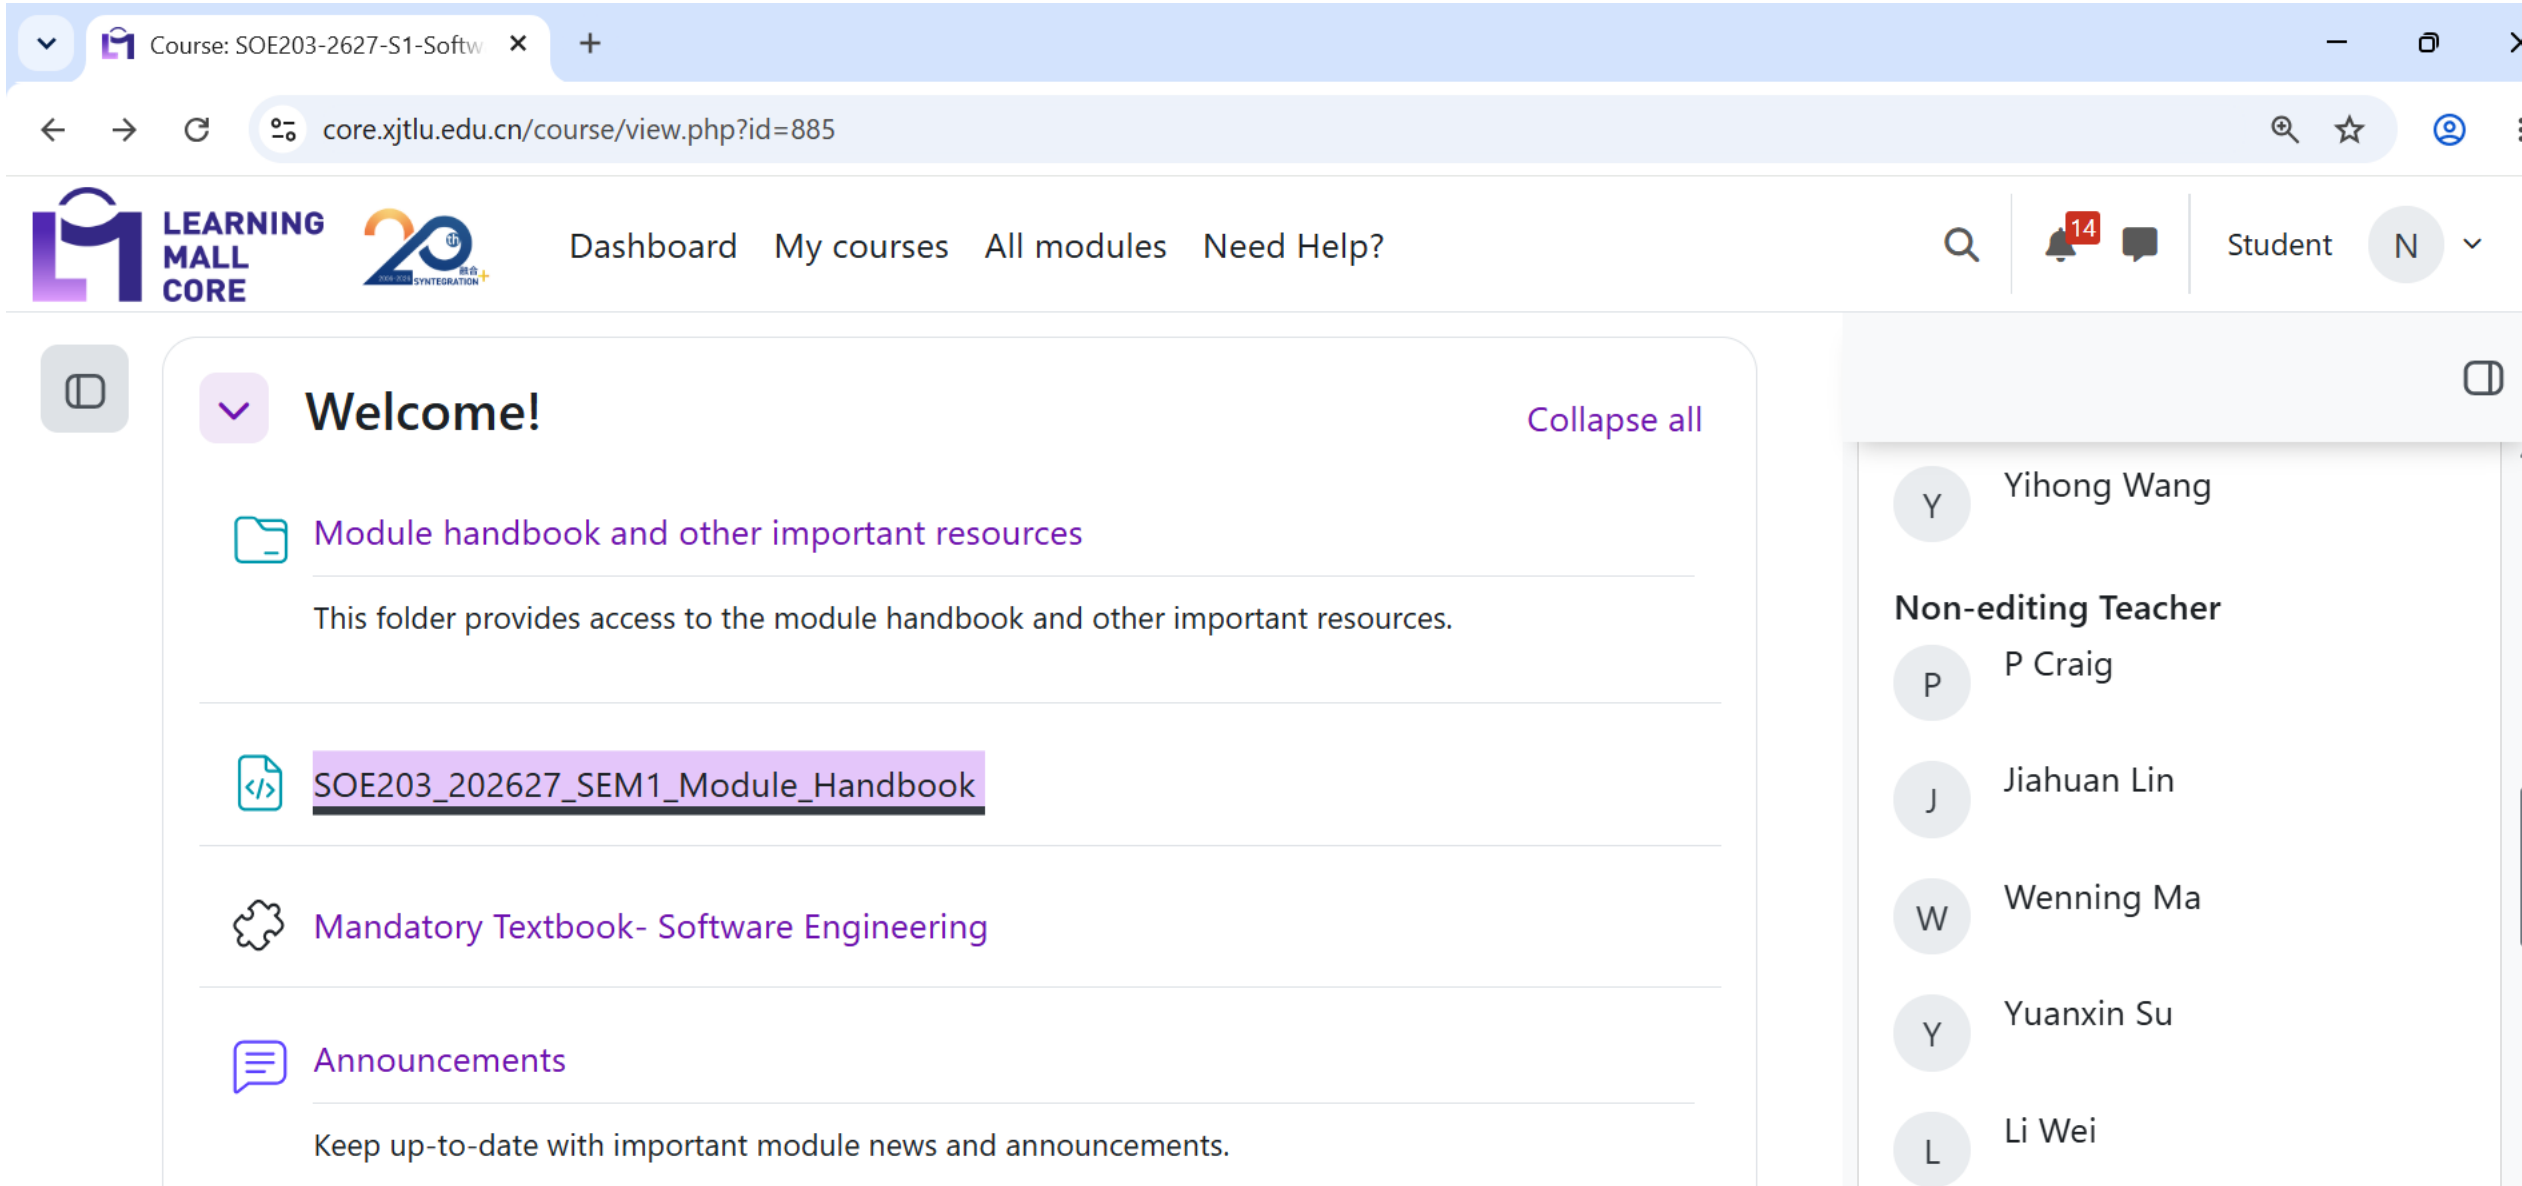

Key module information

- Module handbook, including
  - Coursework / Group work
  - Exam and resit
  - Staff office hours and contact information
  - Week 7 - Consolidation Week
- Learning materials
- Textbook and other reading books
- AI tutor
- Attendance
- Lectures and tutorials/labs

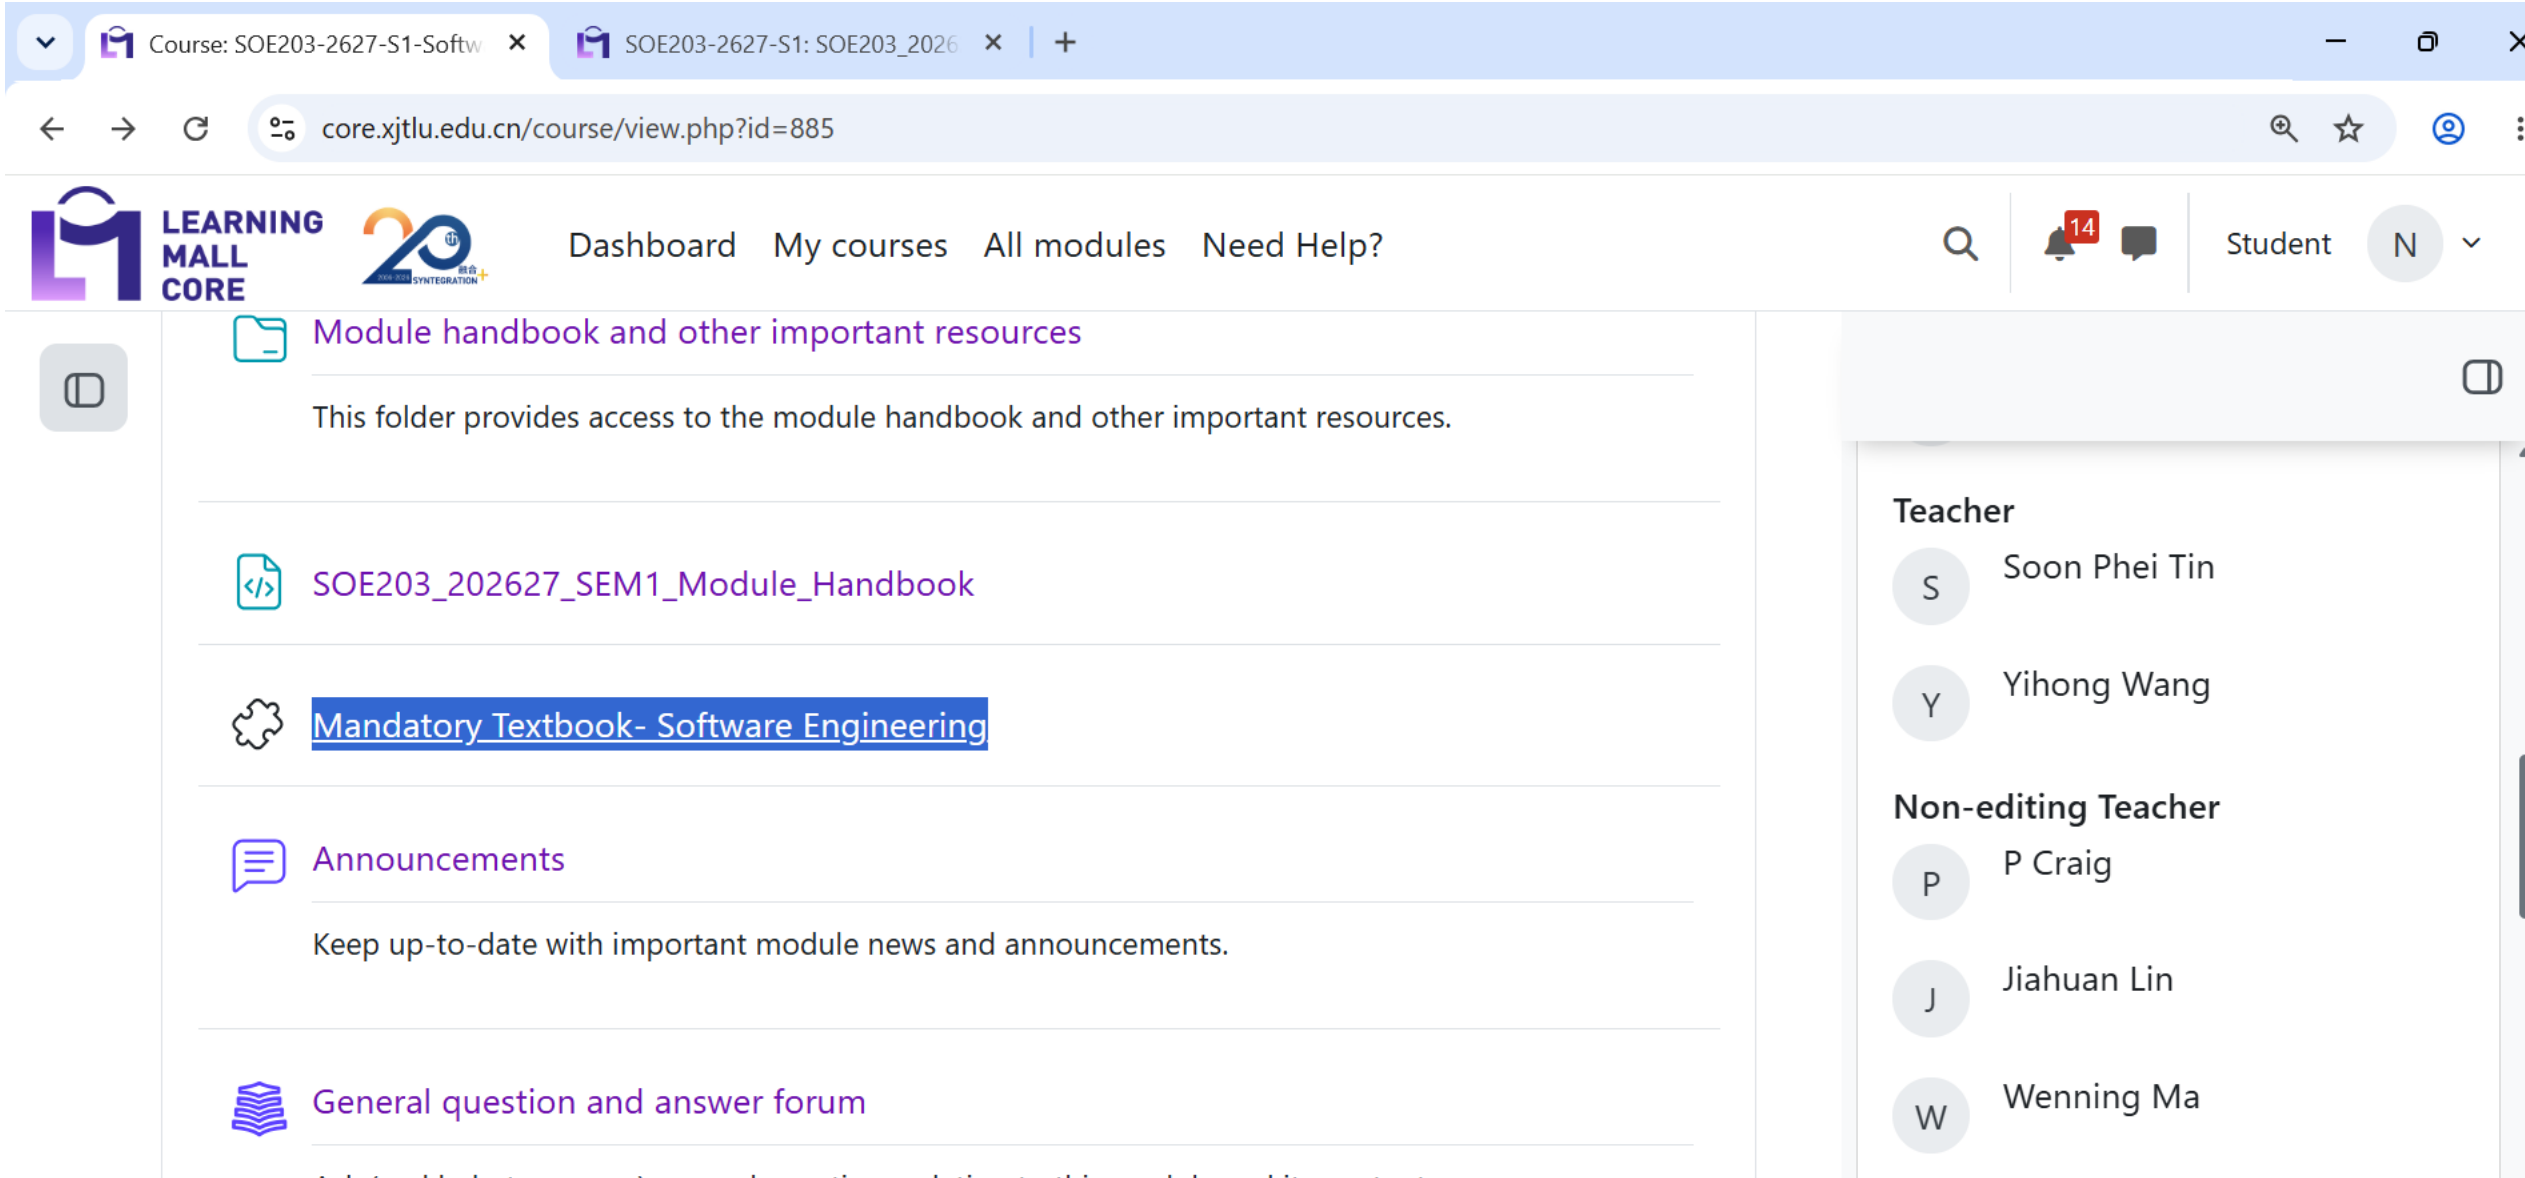

Module handbook

Xi'an Jiaotong-Liverpool University
西交利物浦大学

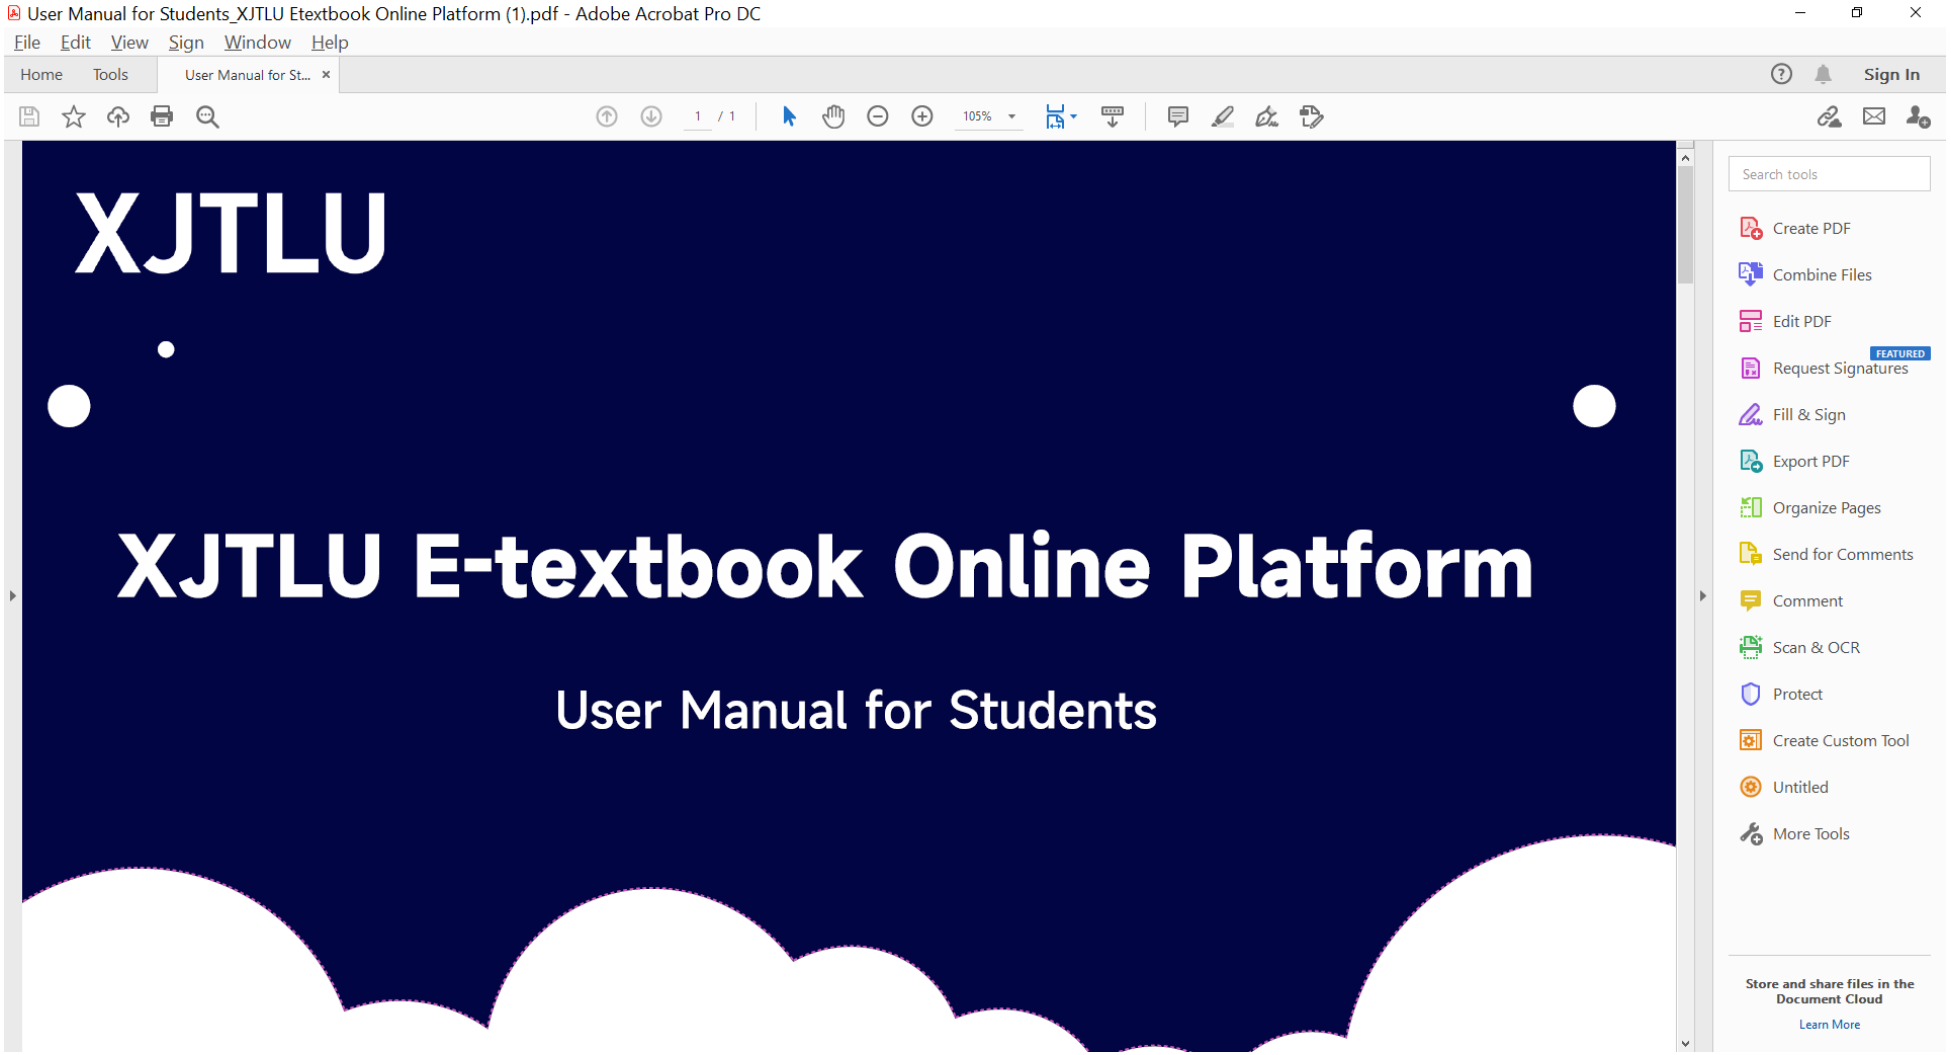

Mandatory Text book

Xi'an Jiaotong-Liverpool University
西交利物浦大学

How to access the textbook

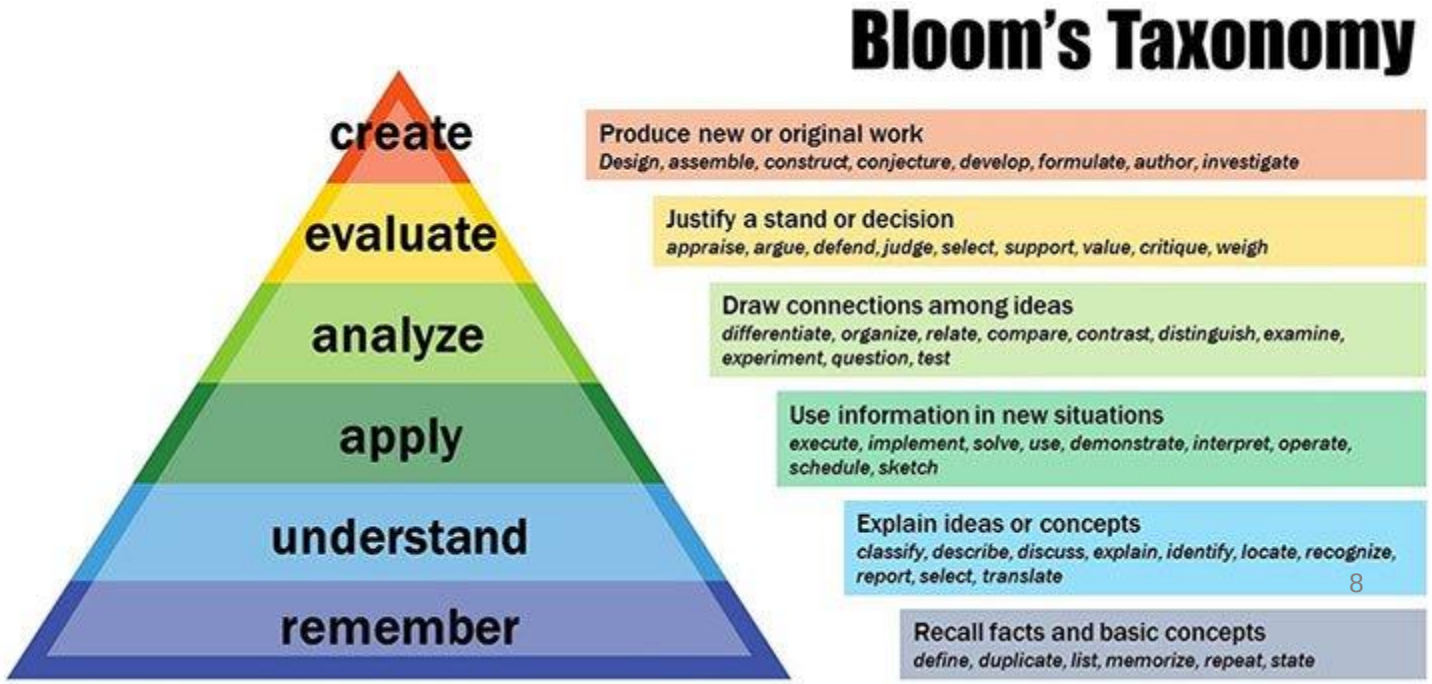

Week 7 Consolidation Week

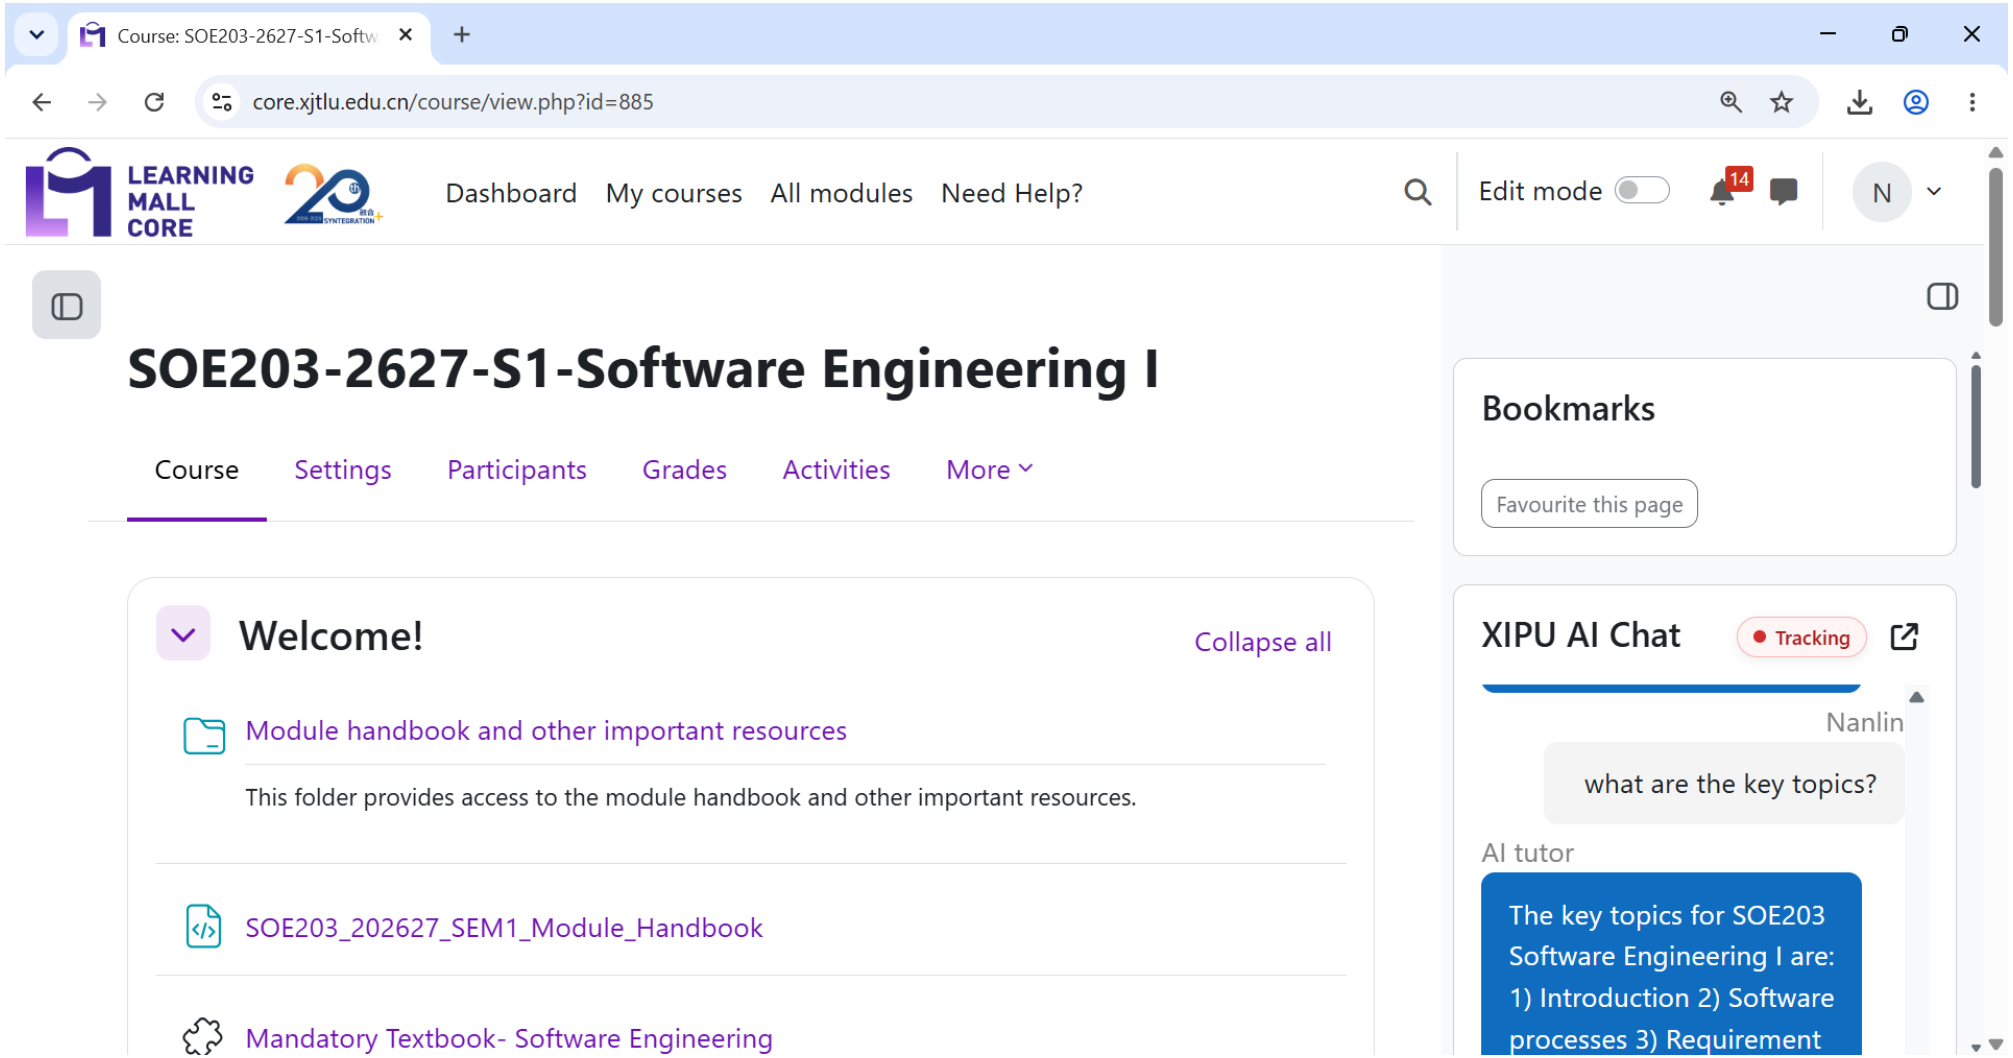

- The intent of Consolidation Week, is to provide students with the opportunity to consolidate knowledge gained over the first half of the semester.
- Not an excuse to take a holiday
- The detail of the learning activities will be released in week 6, on the basis of students' learning progress

Guidance on study hours per week

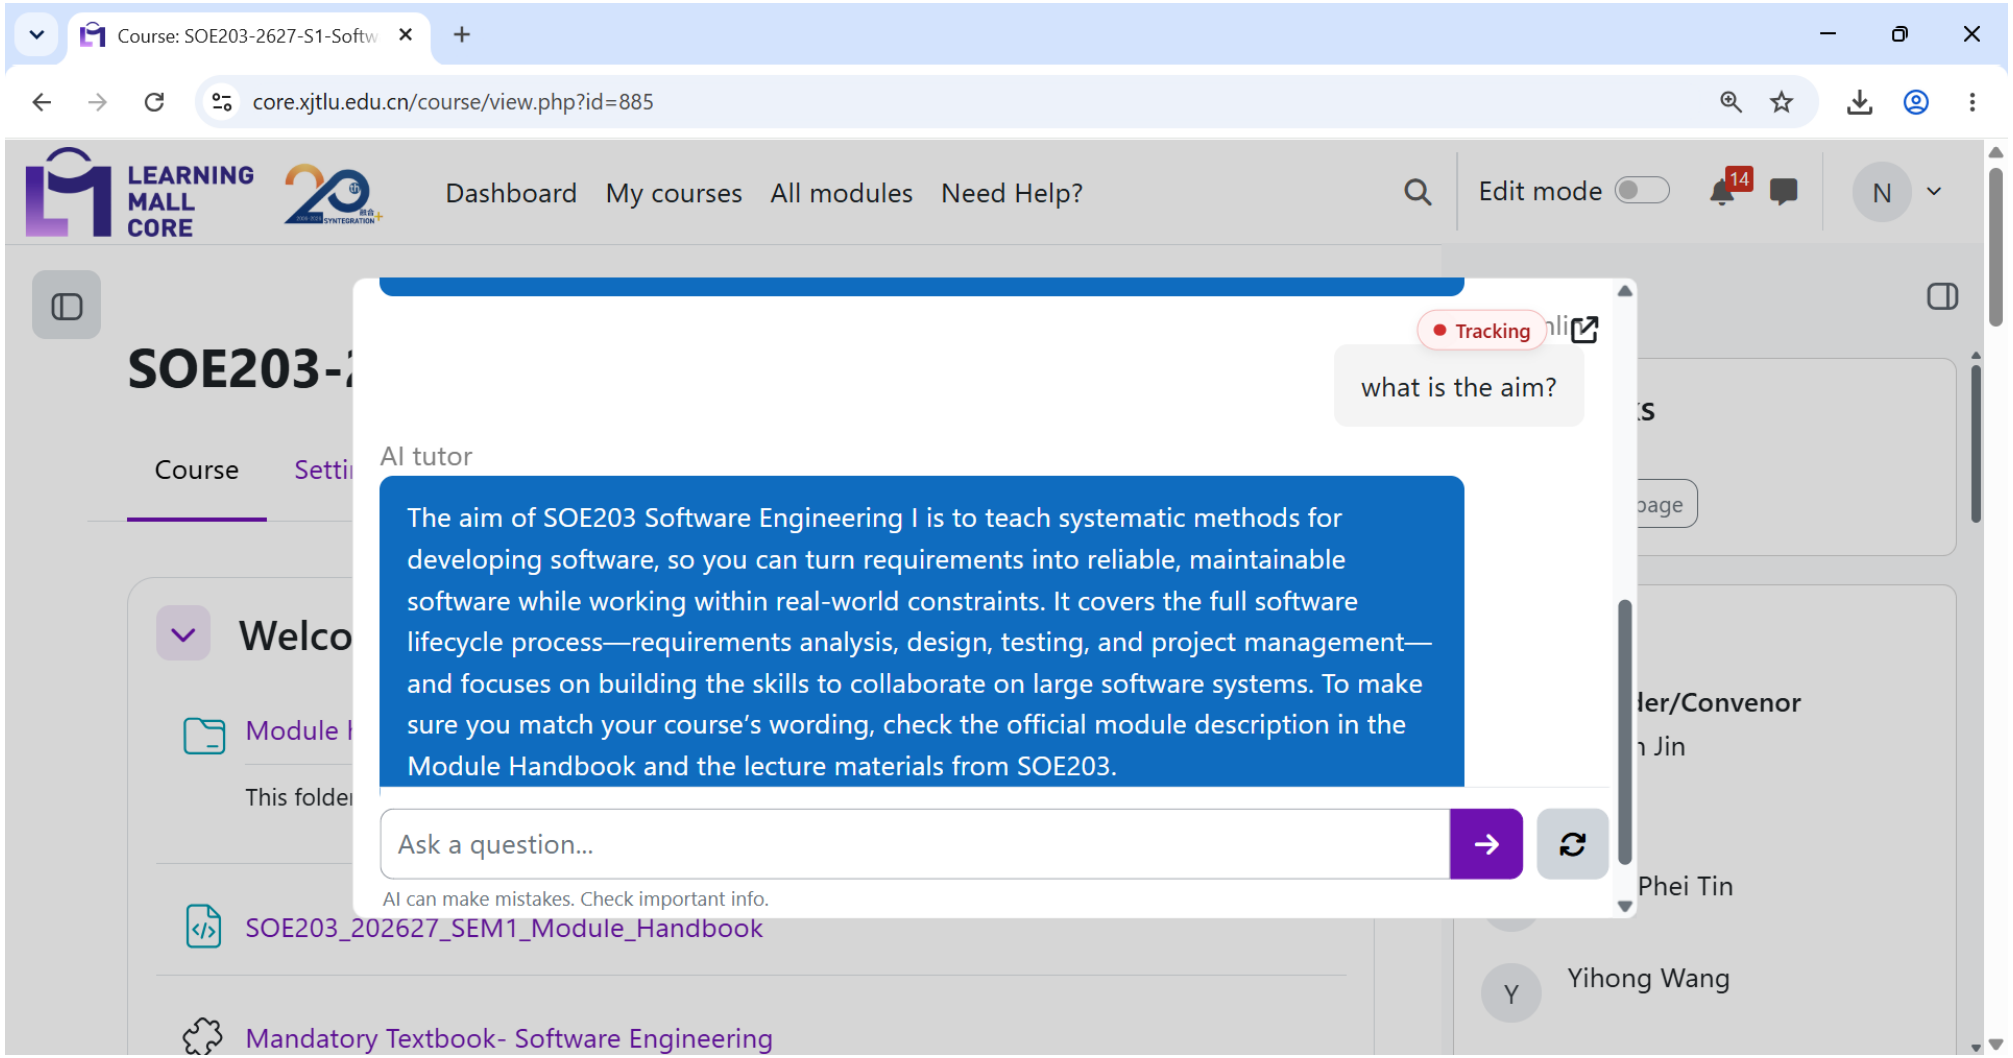

- Attend 3-hour of formal lectures,
- Attend 1-hour of supervised tutorial /lab
- Self study: 6-hour of unsupervised time (reflection, answer the tutorial questions, study lecture materials, reading the e-books).

what is the aim?
AI tutor
The aim of SOE203 Software Engineering I is to teach systematic methods for developing software, so you can turn requirements into reliable, maintainable software while working within real-world constraints. It covers the full software lifecycle process—requirements analysis, design, testing, and project management—and focuses on building the skills to collaborate on large software systems. To make sure you match your course's wording, check the official module description in the Module Handbook and the lecture materials from SOE203.

Choose your group for the two coursework

Choose your group

- A demo how to use the tool
- *Who can be in a group?* Any student who can use this tool (**no** requirement on if group members are in the same lecture or in the same lab session)
- The same group will work on both Coursework 1 and Coursework2 (project)
- ``if we form a group with members less than 6 people. Will we all be separated and randomly assigned, or our current team members remain unchanged, and then we randomly add people who have not yet been grouped?'' – in this case, we try to keep your small team together as much as we can, but no guarantee. So it is better to form a group 6.

Academic integrity

- The university's Academic Integrity Policy, in particular regarding plagiarism, collusion, copying, and so on.
- The related documents are on the learning mall

Notices

- Lectures and labs will be released as videos on the learning mall.
- To write down your own answers and notes
- The sample/suggested solutions to the tutorials/labs will be released on the learning mall
